

Richard Headlam, "Lowes Park", Tunbridge

- a mix of brown sodosol and chromosol (sodic and non-sodic duplex), with areas of hydrosol (seasonally wet) and tenosol (loamy sand and sandy clay loam over medium clay and sand)
- 46 ha paddock, divided based on annual cropping needs, centre pivot irrigator
- 3.5 km E of Midland Highway at Tunbridge
- 2016-17 crops – poppies, garlic, seed potatoes
- easy access for extension activities
- representative of midlands cropping enterprises
- significant soil and irrigation management challenges due to variable soil types under one pivot
